TRIGGER FIT WORKSHEET

YOUR TRIGGER, SET TO YOUR HAND

If your work includes a trigger fit, mark your choices below and send this sheet back with your reply, or answer in the email. Not sure about something? Ask, and we'll talk it through.

Name _____ Order number _____

1 Trigger profile

☐ Flat ☐ Curved

2 Trigger length

Measured from the back of the trigger shoe to where the pad of your finger touches the trigger face.

☐ Short .350″ (can't be skeletonized) ☐ Medium .440″ (where most people are comfortable) ☐ Long .550″

☐ Not sure: send me the Precision Fit Kit ($65, to find the length that suits you best)

3 Trigger weight

Complete Custom Trigger Jobs all come with trigger weights of 3 lb and above.

☐ 3 lb and above (standard)

☐ Sub-3 lb with the Speed Pack, +$120 (skeletonized trigger shoe, Litespeed hammer, ultra-light sear, ultra-light disconnector, sub-3 lb sear spring)

4 Trigger roll

☐ Short ☐ Medium ☐ Long

5 Skeletonize the trigger after fitting?

☐ Yes ☐ No

Short triggers can't be skeletonized.

6 DLC coat the trigger after fitting? $60

Included free of charge in the Virāgō, Homados, Gungnir and Talos packages.

☐ Yes ☐ No

Note: DLC on aluminum may show signs of wear faster than DLC on steel. We do everything we can to mitigate this and have had no complaints yet, but it can happen.

Anything else about your trigger

Return with your reply, or call 352-355-9389.
